

REACH – Registration, Evaluation & Authorisation of Chemicals
Regulation (EC) No 1907/2006

REACH came into effect on June 1st 2007 and requires the registration of all chemicals produced or imported into the EU in quantities greater than 1 tonne per year.

NCH is continuously assessing the impact of REACH on its products and services and is fully committed to complying with all aspects of the legislation. NCH has pre-registered all substances that we produce and import where applicable and has received confirmation from suppliers for the pre-registration of substances in raw materials that NCH purchase.

At this point in time NCH is not aware of any product, in its range, being withdrawn due to the requirements of REACH and will continue to support customer requirements to use its products in a safe and efficient way.
